

How to connect with Ukrainian Talent

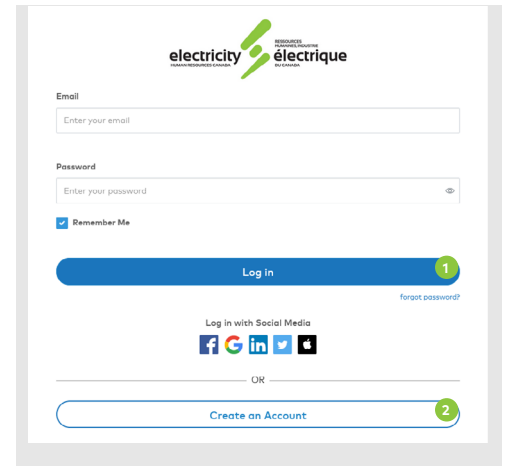

This guide provides employers in Canada's electricity sector with basic instructions on using the platform to target job postings to job seekers who have identified as Ukrainian newcomers.

Hire Ukrainian newcomers in just a few easy steps

1 Log in to your existing account or create a new one for free.

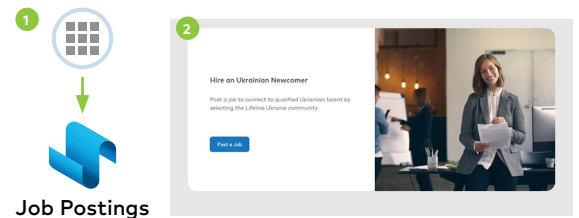

Log in¹ or create your account² through the EHRC [portal](#).

If you're a new user, you'll be taken through a short onboarding process to complete your profile and begin posting jobs.

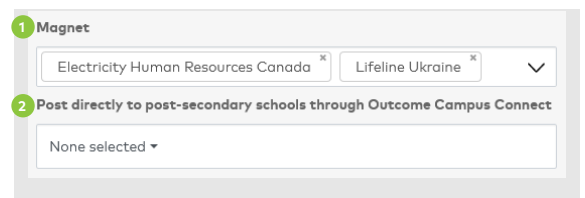

2 Create your first job posting.

Find the Job Postings icon in the menu at the top right of your home tab¹ or click **Post a Job**². Using customized filters, you can target your posting to job seekers based on skills, credentials, experience, qualities, and more.

3 Target your job posting to Ukrainian newcomers.

You can target your job posting to specific communities of job seekers on the platform. Make sure you've selected Lifeline Ukraine under communities you'd like to target¹. Under Outcome Campus Connect communities, please make sure you see "None selected."²

You're now ready to activate your posting!

Your job posting will be submitted for review and go live once approved. Please allow one business day for this process.
